Problem Statement

Gym Goers on campus have no way of knowing how busy a gym is before walking there. Our app would allow users to check gym availability and save time by knowing beforehand how busy a gym is.

Who is experiencing the problem?

Persons wanting to attend gyms around campus.

What is the problem?

The problem is that there is no way of knowing how crowded a gym is until you arrive.

Where does the problem present itself?

The problem presents itself at the gyms around the campus as they are often very busy and you have to wait to use machines.

Why does it matter?

This app would allow people to not waste time going to a gym that would be overcrowded and that would also not have the machines that they would use available. Many people also experience anxiety and fear of being judged by others. This app would allow the members of the gyms to be knowledgeable of times where they would be able to and feel comfortable going to the gym based on how busy the gym is.
